			Training in Public Service sector	TR								
			Program for Improvement of Laboratory Quality Management System in Namibia	PCP-TC								

		Grant Assistance for Grassroots Human Security Projects	GGP				2.87	

Priority Area 2	Contribution to poverty reduction and livelihood improvement												
	As shown by the Gini coefficient 0.57 (2015) that measures income inequality, there is a significant disparities between the rich and poor in the country. Particularly the majority of residents in the northern regions, accounting for approximately two thirds of the population of the country, live on very low income. Most of the people in the rural areas engage in small-scale agriculture as their main livelihood, and face many challenges, such as constraints in dealing with the impact of climate change which lead to frequent droughts and flood events, not enough quality and quantity of agricultural technicians, shortage as well as lack of maintenance capability of facilities and equipment. An immediate				in identifying the way forward for increasing agricultural productivity of small-scale farmers, especially targeting the northern regions where many low-income people live.
