

Ambassador Nishimaki's site visit to Hyphen's Green Hydrogen project (July 23, 2024)

2024/7/23

On July 23 2024, Ambassador Nishimaki visited Hyphen's Green Hydrogen project site near the harbour town of Lüderitz in southern Namibia. Ambassador familiarized himself with the Green Hydrogen project through a presentation by Hyphen.

The project is being developed as the first step in the implementation of the Namibian Government's strategy for the development of a large-scale Green Hydrogen industry. Hyphen Energy indicated that the US\$10 billion project is planned to be developed in phases, at full development targeting 350,000 metric tons of Green Hydrogen production a year from 7GW of renewable generation capacity and 3GW electrolyser. The project, once fully developed will employ an estimate of 3,000 people, with 15,000 construction jobs supported over the four-year construction period. Over 90% of these jobs are expected to be filled by local Namibians.

Ambassador Nishimaki being briefed at the Green Hydrogen project site situated in the Tsau //Khaeb National Park.
